EXPERIENCE

Bublitz gGmbH, Berlin, Germany— *Web Developer / Webmaster (remote)*

FEBRUARY 2017 - PRESENT

I was responsible for developing and managing Bublitz's portfolio of WordPress and standalone websites, as well as their SEO and email marketing campaigns.

TV Eiche Horn e.V., Bremen, Germany— *Freelance PT / Group Fitness Instructor*

JANUARY 2019 - NOVEMBER 2023

I led fitness classes for diverse groups, helped gym members perfect their training routines and created training plans for new members. Additionally, I researched, set up and managed the new booking system for classes and kept the website up-to-date.

Bahar Boutique Tesettür, Bremen, Germany— *Project Intern*

APRIL 2016 - JULY 2016

The main focus during my internship was developing an e-commerce solution for their boutique, but I also helped with customer communication and managed their social media accounts.

enso24.de, Bremen, Germany— *Web Developer*

MAY 2013 - FEBRUARY 2014

During my time at enso24, I developed their website and created a custom CRM system using PHP and MySQL.

SKILLS

Software Development

Systems Administration

Fitness / Nutrition Coaching

TECHNOLOGIES

JavaScript / TypeScript / Node.js

Python

React / React Native / Next.js

MongoDB

SQL (MySQL & SQLite)

WordPress

HTML & CSS

Jest / Vitest

LANGUAGES

English - Native Speaker

German - Native Speaker

MuscleQuest— Fitness mobile app

2024 | TypeScript, React Native, Expo, MUI

I am currently working on developing a local workout tracker app that will combine all the features I have been looking for in existing apps but sometimes can't find. My main goal is to make striving for self-improvement an enjoyable experience, so I plan to gamify the app by adding RPG elements.

Personal Website

2024 | TypeScript, React, Tailwind CSS

The portfolio website that I designed and built.

Food Finder— Restaurant finder web app

2024 | TypeScript, React, Firebase, Maps API, MUI

A front-end web app built with React, Firebase and Maps/Places API. It aims to help users find nearby restaurants based on their preferences and location.

Blog— Full-stack blog

2023 | JavaScript, React, Bootstrap, Node.js, Express, MongoDB

A full-stack blog application built with React, Bootstrap, and a backend API running on Node.js and Express with MongoDB. The project enables users to register, create, edit, delete posts, and recover passwords through email. The frontend fetches data from the backend API to deliver a seamless blogging experience.

Top 100 Music Time Machine — Billboard to Spotify Playlist Generator

2023 | Python, BeautifulSoup, Spotipy

This Python script fetches the Billboard Hot 100 chart for a specified date and creates a private Spotify playlist containing the top 100 songs.
